## WORK EXPERIENCE

### Software Engineer

Rubico IT Private Limited

07/2019 - Present

Haridwar

#### Achievements/Tasks

- **Applicant Tracking System** - Web application specifically designed for our HR team to track the candidate's application. The role includes developing the backend REST API for the Vue.js team, documentation of the API's resources, and writing specification documents.
- **Tax and Sync Application** - The tax application is designed for verifying the tax-related data and the sync application works as an upload manager for uploading the data on the S3 bucket. The role includes developing the frontend using the JavaFX and the REST API for the backend operations.
- **Classic Accounting** - Accounting software designed for the various accounting operations like inventory management, billing, general ledger, and payroll-related stuff. The role includes developing the frontend using the swings and managing the backend.
